“Oleksiy has successfully established a strong working relationship with his peers and migration stakeholders within the client. He has contributed to identifying and defining possible improvements that could expand our company’s role within the client, understanding the commercial benefits this would bring to both our company and the client.

Confident in his abilities and understanding, Oleksiy is very capable of managing his workload and that of his teams. He has led a migration team within the datacenters migration initiative, delivering many successful migrations. He has mentored and guided his team through requirements and workloads, achieving excellent results.

Oleksiy’s migration team has returned the best results so far in the migration initiative, a testament to his leadership and ability to unify his team. He possesses the required skills to manage a technical team in a client environment. His good language skills enable him to communicate effectively with teams and clients across multiple locations in Europe. He provides clear reports on team progress and blockers, ensuring challenges are resolved promptly.

Oleksiy has excellent technical skills and, coupled with his ability to plan and schedule his and his team’s work, has become an integral part of the successful migration workstream. His grasp of migration methods, AWS infrastructure, costs of hosting, and security has helped him and his team successfully migrate numerous technologies to AWS, adhering to target completion timelines.”

“Oleksiy is fully aware and engaged in strengthening the client relationship, with a keen understanding of the commercial aspects of the engagement with the client. He identifies opportunities for further expansion of our presence in the client’s organization and promptly points out areas for improvement.

As a senior professional, Oleksiy is fully capable of managing all aspects of his tasks and roles. Currently, he leads the Migration team “Amos”, which has the best performance and accomplishments among all migration teams involved in the migration initiative covered by our company.

Oleksiy has validated that he possesses all the soft skills needed for a technical leadership role. He understands, manages, and resolves potential challenges in people and project management. He is a self-esteemed and dedicated person you can trust.

In addition to his strong technical knowledge, which is one of his greatest capabilities, I can confidently say that Oleksiy is the best technically capable person in the entire Endava team involved in the datacentres migrations to AWS. Besides AWS knowledge, he has understanding, knowledge, and experience in other areas equally important to migration projects, such as operational processes and challenges, compliance, security, and cost control.”
