

Phykon's DevOps Support

Secure and managed support that
drives the outcome-based growth you need

Leverage the benefits and ease of continuous delivery, with Phykon's DevOps Support. We help you overcome obstacles related to legacy technology and operating models, to become modernised, agile, productive and empowered to deliver uninterrupted services.

Phykon has deep expertise with tools across the DevOps ecosystem that are essential to promoting a collaborative project environment. We streamline your process lifecycle, increasing productivity and work quality.

Unlock Growth, Drive Value

Phykon provides on-demand DevOps support services that include:

- Cloud infrastructure support and maintenance
- 24/7 monitoring and incident response
- Automation and deployment
- Cloud cost optimization
- Security and compliance
- Disaster management

Leverage the **agility, scalability and cost-effectiveness** of the Cloud through Phykon's DevOps support services. Move your data centre capabilities from on-site facilities to cloud-based infrastructure owned by a cloud services provider such as Amazon Web Services (AWS) or Microsoft Azure. **Data centre capabilities** can include servers, networking equipment, application software, business process services, and infrastructure software. Provision, run and optimise your IT infrastructure and Cloud operations on AWS and MS Azure with **absolute peace of mind**. Access a wide range of **latest tech integrations, round-the-clock flexibility and limitless scalability** with Phykon's DevOps Support.

Phykon's DevOps solutions are designed to mitigate issues related to long waiting times, traceability problems, errors in deployment, communication and collaboration and more. With robust DevOps, your teams will be able to **innovate better, iterate faster and collaborate seamlessly**. **Increase operational efficiency and deliver better service faster** with reliable DevOps solutions from Phykon.

Why You Should Choose Phykon

Significant time and money savings: When you are with Phykon, you do not require on-site physical infrastructure or supporting staff. You will also save on incremental costs related to upgrades, additional infrastructure or demand spikes.

24/7/365 Monitoring and Support: We excel at this. We deploy experts with extensive experience to ensure continuous monitoring and prompt incidence resolution.

Bespoke Solutions: We understand that no two businesses are alike. We tailor solutions based on your business needs. This is why our solutions target pain points accurately to deliver the results you've always wanted.

Security: Our well-established procedures, combined with robust cloud governance, compliance, and visibility features, offer unmatched transparency and control over your IT environment. Our data protection protocols and privacy measures ensure the safety of your information.
